

# Thuraya WE

## Connecting Everyone Everywhere

### Satellite & LTE Hotspot

*Staying connected is a priority. It's at the heart of your social identity and self-expression. It's how you reach out to your family and closest friends, to share with them your experiences and news.*

*We at Thuraya understand this fundamental need, and that's why we have been evolving and advancing our data products throughout the years to meet this ever-growing global demand for wireless data connectivity. Thuraya WE was developed to converge satellite with terrestrial communications. It is the world's first dual mode Satellite & LTE hotspot that keeps you in contact with your family and friends all the time, no matter where you are.*

*Thuraya WE allows you to automatically switch between Satellite and GSM networks with a click of a button using the Thuraya WE mobile app and web interface. With Thuraya WE, you can transform any area into a Wi-Fi hotspot, and allow up to 10 smart devices to connect and share internet within a range of 30m or more.*

### Product Features

#### **Single SIM, dual mode hotspot**

Thuraya WE is the only hotspot in the market to offer dual mode capability. It extends data coverage by offering Satellite & LTE broadband data services allowing you to move in and out of terrestrial coverage areas with ease. You can opt for a Thuraya SIM card and connect to the satellite network or a GSM SIM to enjoy LTE speed. When outside of GSM coverage roam into Thuraya's network using any of our global data roaming partners and stay connected.

#### **Manual or auto-network selection**

Thuraya WE enables you to flexibly switch between networks by setting up the auto-network switching function on the web interface or smart phone app. The hotspot will automatically switch from your default network to the other network once you're out of coverage. You can still manually select and switch between networks through Thuraya WE web interface and mobile app by selecting manual network selection.

#### **Calls and text messages in satellite mode**

The Thuraya WE app transforms your smart device into a satellite phone, it enables you to access your existing phone's contact list to make satellite calls and SMS's when satellite mode is selected.

### Easy to use interface

To fully control the hotspot, Thuraya has developed a user friendly interface that can be accessed either through the web or through a mobile app compatible with iOS and Android systems. Thuraya WE interface, allows you to easily select and switch between networks, locate the satellite, view signal strength, connection status, battery status, system alerts, data usage reporting, and access device settings.

### Unified communications

With Thuraya WE, you can transform any area into a Wi-Fi hotspot, connect all your devices and applications, enjoy the internet by connecting up to 10 smart devices to Thuraya WE within a radius of 30 meters or more.

### Lightweight and durable

Weighing 1 kg only, Thuraya WE is compact light and portable, offering voice and data connectivity on the go. It holds the globally recognized Ingress Protection Rating IP54 which provides protection from dust and water spray from any direction to withstand harsh environments.
